

June 5, 2015

Ying Yu
NanJing University
22 Hankou Road
Nanjing Jiangsu 210093 PR China

Dear Ying:

Congratulations! We are delighted to confirm that you have been selected to be a 2015 GPU Education Center. NanJing University has been selected as a GPU Education Center based on your demonstrated commitment to advancing the state of parallel education using GPU Computing and/or CUDA C/C++.

Benefits. Your status as a GPU Education Center qualifies you for the following benefits:

- GPU teaching kit consisting of (1) K40 {active} and (2) GTX980 GPUs as part of this award. Donated GPU models are subject to change. We request that you acknowledge NVIDIA should you publish with any of the donated GPUs.
- (10) Massively Parallel Programming book.
- Participation in the [Centers Reward Program](#) to receive special pricing on Tesla equipment. Check with an [NVIDIA OEM and Tesla Reseller](#) for details on this special pricing.
- Access to [webinars](#) for CUDA and GPU related programming from experts in various fields.
- Access to our technical team for support when needed.
- Access to 100 GPU programming labs available at [nvidia.qwiklab.com](#) for free, of which you can divide amongst your students. As these labs are self-paced and hosted in the cloud, a student only needs a web-browser and internet access to participate. Available labs can be viewed [here](#) under Labs tab. If you are interested in using these labs, please create an account at [nvidia.qwiklab.com](#) and send the email address you used to [Chandra](#). Instructions will soon follow for giving access to your students.
- [NVIDIA-certified slides, hands-on lab exercises](#), and [additional course content](#) you can use in your classes.

Expectations. We expect that you will

- Include GPU Computing and/or CUDA C/C++ as a substantial portion of the curriculum in at least one graduate or undergraduate recurring course on parallel programming.
- Participate in the [GPUComputing.net](#) forum, including the GPU education community.
- Provide occasional CUDA training available to other members of your University community.
- Encourage the active use of the CUDA training lab so that it is continuously booked.
- Keep NVIDIA informed of all major scheduling and course changes relating to the CUDA training courses.
- Provide NVIDIA with a course summary - what worked, what didn't, recommendation for improved course materials, etc.
- Participate in the Spring 2016 [GPU Technology Conference](#) in San Jose, CA, if you can.
- Post the GPU Education Center Logo on your website and obtain permission for us to post your logo on the [GPU Education Centers](#) webpage.

Any donations are considered unrestricted gifts and carry no obligations or deliverables except that they should not be charged overhead or indirect costs. Your GPU Education Center status starts today and will end on June 5, 2016. As a GPU Education Center, we will showcase your institution on our GPU Education Center website.

We are pleased to be a partner in your efforts to advance parallel computing education at NanJing University and look forward to future collaborations this coming year.

Sincerely,

A handwritten signature in blue ink that reads "David P. Luebke". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

David Luebke, Ph.D.
